Once they go dark, players will no longer be able to make digital purchases or buy any DLC on each of the respective platforms.The PS3 and PSP's stores will officially close on July 2, while the PS Vita store will shut down on August 27. After these dates, you'll be able to re-download and play previously purchased games and video or redeem games via codes and PlayStation Plus vouchers, but you won't be able to purchase a game digitally.According to a PlayStation FAQ where the changes were announced, after those dates you'll no longer be able to add funds through those systems - but any money in your wallet will carryover onto the PS4 or PS5.Even though Sony ended PS3 production four years ago, the console sold 87 million units during its 11 years on the market, which means players will have had over a decade to build up a library of titles. The PSP and Vita represents Sony's foray into the handheld market, and while the PSP was deemed a relative success, shifting 81 million units since its March 2005 release, the Vita didn't fare so well and was widely considered a failure. So much so, that Sony all but pulled support for the handheld after only a few years on sale. With Microsoft committed to letting Xbox gamers play original Xbox, Xbox 360 and Xbox One games on Xbox Series X and Series S consoles, it's disappointing to see Sony removing one of the only avenues left to purchase its back catalog. It also brings up the age old debate of digital storefronts, and what happens when they're taken offline for good.Opinion: Xbox Series S is now a real threat to PS5 Source: Nicholas Downie / Android Central The PS3, PSP, and PlayStation Vita are three older, retired Sony consoles, but you could still buy games for them on digital storefronts. A report surfaced earlier this month that the game stores for those consoles would be shut down this year. Sony confirmed it's closing these stores on July 2 (for PSP and PS3) and August 27 (for PS Vita) Well it's official: Sony is closing the PlayStation Stores on PS3, PSP, and PS Vita. We heard reports that it was happening, and Sony has now confirmed that the rumors were true. It's officially shutting down the stores on those three consoles, meaning that, after this summer, you'll no longer be able to buy or download new games from those consoles. The confirmation comes from the PlayStation support site. The notice board has an entry on the store closures that reads: "We are closing PlayStation™Store on PlayStation®3 consoles on 2nd July 2021 and on PlayStation®Vita devices on 27th August 2021. Additionally, the remaining purchase functionality for PSP™ (PlayStation®Portable) will also retire on 2nd July 2021." Users will still be able to download games and media they already own on those consoles, but won't be able to purchase anything new. The first sign that the Stores were being shuttered, other than the report earlier this month, came when ResetEra users discovered this weekend they couldn't access an old web workaround that let them access an older version of the Store on the web. Sony rolled out a new store last year that removed all of these games from the roster, as well as the wishlist feature. But still, there are several games available on these consoles that you can't get anywhere else. For example, not only are there several excellent Vita games, but the Vita is also the only official way to play several PS1 classics digitally. Sony still has yet to provide a way for gamers to really access or play its older titles, and simply offering remakes for a handful of titles isn't enough. An optimistic view is that Sony will eventually offer these older titles to play via some revamped version of its PlayStation Now service, but we've yet to hear any hint of that from Sony itself. Source: Naughty Dog A new report indicates that Sony will permanently close the PS3, Vita, and PSP digital storefronts in a few months. There will be no way to purchase digital-only games that released on these platforms and have not been made available for PS4 or PS5. The report states that an official announcement from Sony is apparently planned for the end of March. You'll no longer be able to buy digital games or DLC from the PS3, Vita, and PSP storefronts in the coming months according to a report from TheGamer. Sources speaking to the outlet have indicated that the aforementioned stores are set to shut down permanently in July and August, with an official announcement regarding the matter supposedly coming from Sony in the coming days. The PS3 and PSP stores are set to be closed on July 2 while the Vita store will remain open until the end of August. It's unclear what is causing the apparent disparity between the closing dates. While a lot of older titles are available on PS4 and PS5 through the PlayStation Network and through its Classics program, this closure will mean that a ton of games will no longer be available to purchase at all as they were only released digitally with no physical copies in circulation. PlayStation Now also includes dozens of PS3 and PS2 games for players to download or stream, and it's unclear what this announcement could mean for the service. This is another blow to game conservationists and archivists, and another reason that players were hoping the PS5 would be backward compatible with all previous PlayStation generations, as some unfoound rumors had indicated. As it stands, only PS4 games are backward compatible on the PlayStation 5, with a handful of exceptions that don't perform up to standards. (Image credit: Sony) PS3, PSP and Vita stores are getting shut down by the end of this summer. Sony confirmed that the PS3 and PSP stores will be permanently shuttered in early July and the Vita store will get ousted by the end of August. Users of PlayStation's legacy systems will still be able to re-download and play previously purchased content, including videos and media. However, PS3, PSP and Vita users will no longer have the ability to buy new games nor make in-game purchases.PS3, PSP and Vita stores get the bootIn addition to Sony's termination of new purchases, PS3, PSP and Vita users will also lose the ability to redeem PSN wallet fund vouchers (i.e. gift cards) on their legacy systems. But there is a silver lining: vouchers will remain in users' PSN accounts, so they can be used to purchase PS4 and PS5 content. If users do not own a PS4 nor a PS5, they can request a refund (Sony will flesh out refund details at a later date).PSP and PS Vita (Image credit: Sony)Sony says it's shuttering these services to focus on its current-generation products. "After thoughtful consideration, we decided to make these changes in an effort to focus our resources for PlayStation Store on PlayStation 4 and PlayStation 5, which will enable us to enhance the customer experience even further. We thank you for your support on these platforms throughout the years," the gaming giant said in an email.As mentioned, PS3, PSP and Vita users will still be able to re-download and play previously purchased titles. Once the stores get shut down, users can access owned content via their console's Download List. Additionally, PlayStation Plus users can also re-download and play previously claimed games as long as they remain subscribed to the service.You can get more details on how users will be affected by the PS3, PSP and Vita store closures here.PS3 and PSP stores will shut down on July 2. The Vita store will close on Aug. 27. This is the first time Sony has shut down online services for systems released after 2005, according to Dot Esports. The PSP launched in March 2005 with the PS3 following in its footsteps in November 2006. The Vita is the most recent of the three; it hit the market in December 2011.
